NETAFIM USA INTRODUCES DRIPNET PC HEAVYWALL DRIPPERLINE Affordable and Reliable Pressure Compensating Solution for Irrigating Permanent Crops

Fresno, CA – Netafim USA, the industry leading manufacturer of drip/micro irrigation systems, has expanded their line of heavywall products to include DripNet PC. Originally developed for the row crop market, DripNet PC provides an economical heavywall solution for irrigating permanent crops with long runs and steep topographies with high uniformity. DripNet PC features the same proven-performance of Netafim's leading heavywall dripperline, at an affordable price:

Virtually Clog-Free Dripper Design

- Largest filtration area prevents penetration of dirt particles into the dripper.
- Chemical resistant, self-cleaning, self-flushing dripper diaphragm removes debris throughout the irrigation cycle.
- Industry's widest and shortest dripper flow path. Wide cross-section allows large particles to pass easily through the short flow path virtually eliminating clogging.

Dependable, Reliable Dripper Performance

- Injection-molded drippers have the lowest co-efficient of variation – less than 3%, unlike other manufacturers. The same dripper is used in every dripperline regardless of the tubing's inside diameter or wall thickness providing consistent, reliable performance.
- Pressure compensating – delivers precise water applications nearly everywhere in the field and operates at the industry's lowest regulating pressure – 6 psi.
- Available with a wide range of flow rates and dripper spacing for specific application rates and control of wetting pattern in different soil types.

DripNet PC Heavywall Dripperline is ideal for slope and undulating terrain, surface or subsurface installations and most water quality conditions.

Awarded **ISO 9001:2000 Certification** by the International Organization for Standardization – Netafim USA is the largest growing division of the Netafim International Group, the pioneer of micro-irrigation technology. With over 44 years in the irrigation industry and global expertise in more than 120 countries, Netafim offers a full-line of products for a variety of markets including agriculture, landscape, greenhouse, nursery, mining and wastewater. Netafim USA is headquartered in Fresno, California.
