SERIES 80 NYLON CONTROL VALVES AVAILABLE IN SINGLE UNITS ONLY

Netafim recently introduced the Series 80 Nylon Control Valve. These valves are the only valves in the market specifically designed for greenhouse and subsurface drip (SSDI) landscape applications.

- Very low friction loss from extremely low to high flows
- Flow control stem allows manual closure
- Durable, corrosion-resistant materials

The Series 80 Nylon Control Valves are available in 3/4" and 1" sizes with globe configuration and 1 1/2" and 2" sizes with globe or angle configurations. They are standard with 24VAC solenoids and other solenoid options are available.
