NETAFIM USA INTRODUCES VIBRONET SPRINKLER AND MISTER Featuring Drip-Less Operation with Highly Uniform Watering

Fresno, CA – Netafim USA, the industry leading manufacturer of drip/micro irrigation systems, has added the VibroNet Sprinkler and Mister to our Greenhouse & Nursery Product Line. Growers that are hand watering their bedding plants can reduce their labor costs and free more management time by installing a greenhouse sprinkler system. No other sprinkler system combines ease of design with drip-less sprinkler operation and high uniformity to produce a higher crop value with less input costs.

VibroNet Sprinkler offers these additional features:

- Flow rate of 10.4 GPH
- Ideal for watering single benches 4 to 6 foot wide
- Recommended placement is 2 to 5 feet above the crop

VibroNet Mister offers these additional features:

- Flow rate of 5.3 GPH
- Ideal when a light mist is needed for watering, germinating or propagating
- Mister spacings between 3 and 5 feet achieve excellent uniformity
- Can be used upright or upside down

Both the VibroNet Sprinkler and Mister are made from the highest quality plastics with excellent Ultra-Violet (UV) resistance. All parts can be assembled and disassembled in the greenhouse without tools. Each assembly contains a check valve which prevents the supply line from draining onto the plants below after shut-down and provides instantaneous on-off for accurate short cycle watering and misting.

Awarded **ISO 9001:2000 Certification** by the International Organization for Standardization – Netafim USA is the largest growing division of the Netafim International Group, the pioneer of micro-irrigation technology. With over 44 years in the irrigation industry and global expertise in more than 120 countries, Netafim offers a full-line of products for a variety of markets including agriculture, landscape, greenhouse, nursery, mining and wastewater. Netafim USA is headquartered in Fresno, California.
