NETAFIM USA INTRODUCES TECHLINE RW DRIPPERLINE WITH NEW PURPLE STRIPE

For Easy Indication of Reclaimed Water Use

Fresno, CA – Netafim USA, the industry leading manufacturer of drip/micro irrigation systems, Landscape and Turf Division has enhanced their Techline RW (Reclaimed Water) Dripperline tubing with a purple stripe for easy identification that reclaimed/non-potable water is being used.

Additional features include a unique dripper design which includes these benefits:

- Anti-siphon mechanism seals the dripper outlet blocking dirt and debris from entering after irrigation making it ideal for poor water applications
- Pressure differential mechanism provides high emission uniformity and a clog-resistant design.
- Continuous self-flushing, free-floating dripper diaphragm allows the dripper to cleanse itself anytime during operation.
- Large Turbonet dripper flow path enables particles to pass through freely.
- Raised dripper position (0.26" from the wall of the dripperline) prevents sediment from entering the dripper when the system is not in operation.
- Chemical and wear resistant helps maintain its design flow over many years of use.

Awarded **ISO 9001:2000 Certification** by the International Organization for Standardization – Netafim USA is the largest growing division of the Netafim International Group, the pioneer of micro-irrigation technology. With over 44 years in the irrigation industry and global expertise in more than 120 countries, Netafim offers a full-line of products for a variety of markets including agriculture, landscape, greenhouse, nursery, mining and wastewater. Netafim USA is headquartered in Fresno, California.
