

**PIONEERS OF DRIP IRRIGATION**

**OUR STORY**

Over forty-five years ago, Netafim pioneered the concept of drip irrigation revolutionizing irrigation practices around the world. Since then, using that same expertise, Netafim, the world's leading manufacturer of drip irrigation products, has developed products to meet the needs of the Mining industry. Today, Netafim USA's Mining Division offers the industry's broadest range of quality products, responsive customer service, global resources and a team of experts to support mining operations.

Netafim USA's Mining Division offers the industry's most responsive customer service - a team of experts and global resources to support your mining operations.

**Our Quality Commitment**

**Netafim USA is ISO 9001:2000 Certified** - ISO, the International Organization for Standardization recognizes companies across all industries that meet or exceed quality standards. Netafim USA strives to lead the way as a true customer driven company and is recognized today throughout the industry for its rigid quality-control measures. Every reel of material undergoes a battery of tests and over 30 quality checks before leaving the factory.

**A Dedicated Team of Experts** - comprised of a Technical Manager, Division Manager and a Customer Service Representative dedicated to the Mining Industry. Netafim also provides world wide market reach through it's global network of manufacturing subsidiaries. Wherever the mine is, Netafim can support it.

**System Solutions** - including Cost-Savings Initiatives, World Class Logistic Services, and Application Designs and Consultation.

**24/7 Manufacturing Production** - provides the industry's fastest customer response.

**MEETING THE NEEDS OF THE MINING AND ENERGY INDUSTRY**

# THE TOTAL SYSTEM SOLUTION ONLY FROM NETAFIM USA

## 1 DRIPPERLINE

**Leach Line X™** - features the industry's widest and largest flow path, providing unrivaled plug resistance and superior performance.

## DRIPPERLINE FITTINGS

(Barbed, Spin-Loc™ and others) - hose couplings, adapters, elbows and male adapters securely connect the dripperlines to the supply line.

## 2 SLOPE SOLUTIONS

**Mine Line™ Dripperline** - pressure compensating for flexibility of leaching even on sloping terrain - supplying a uniform flow of solution from the top of the pad to the bottom of the slope.

## DRIPPERLINE CLIPS

Factory installed clips ensure the solution goes where it should, rather than running down the pipe.

## 3 FILTERS

**Apollo Automatic Self-Cleaning Disc Filter** - provides maintenance-free depth filtration for a wide range of mining applications - with flow rates from 500 GPM and higher. **Also Available:** Manual and Automatic Disc Filters, Manual Screen Filters and Hydrocyclone Separators.

## 4 VALVES

**PVC Valve** - highly resistant to chemicals, ideal for flow and pressure control in corrosive networks. Also available in a wide range of nylon and iron models.

## AIR VALVES

**Industrial Continuous Acting Air and Vacuum Breakers** - guarantee total separation of solution from the sealing mechanism. Available in fabricated iron and stainless steel in a wide variety of models and sizes.

**Air Valves** - proven design delivers more air release capacity than other valves of similar sizes. Available in polypropylene and stainless steel.

## 10 WATER METERS

**Water Meters** - deliver quality performance and long-life flow measuring. Ideal for Gold Mines. Available in sizes ranging from 3" to 12".
