NETAFIM USA INTRODUCES THE APOLLO DISC-KLEEN FILTER Reliable, High Performance, Cost Effective Filtration Solution

Fresno, CA – Netafim USA, the industry leading manufacturer of drip/micro irrigation systems, introduces a new automatic, self-cleaning disc filter – the Apollo Disc-Kleen Filter. Growers have used Netafim disc filters successfully and reliably for over 10 years. The introduction of the Apollo Disc-Kleen Filter allows a grower to filter more for less, saving valuable time and money.

The Apollo Disc-Kleen Filter was developed to:

- Lower the cost of filtration per Gallon per Minute (GPM) without compromising the quality of filtration
- Lower the required pressure for flushing (cleaning) the filter
- Allow filter relocation during crop rotations and rental units in row crop applications
- Reduce installation costs with a pre-assembled water in/water out installation requiring a smaller footprint

A longer filter element with larger discs produces a 20% larger filtration area than previous models. This accommodates a higher flow rate, reducing the total number of required filter units for a specific flow rate thereby reducing the overall cost of the filter.

Offering greater benefits and a better value, the Apollo Disc-Kleen Filter is a great alternative to Sand Media Filters. The Apollo has numerous benefits not available with Sand Media Filters:

- Shorter length of flush cycle means less interruption of water flow to the field while irrigating which maintains higher uniformity
- Can be mounted on a small utility trailer and easily moved from field to field
- Less overall water used for flushing means less flush water for disposal or reuse
- Easier and faster to install with a 60% smaller footprint

Netafim's Apollo Disc-Kleen Filter – quality depth filtration ensuring maximum protection of your irrigation system.

Awarded **ISO 9001:2000 Certification** by the International Organization for Standardization – Netafim USA is the largest growing division of the Netafim International Group, the pioneer of micro-irrigation technology. With over 44 years in the irrigation industry and global expertise in more than 120 countries, Netafim offers a full-line of products for a variety of markets including agriculture, landscape, greenhouse, nursery, mining and wastewater. Netafim USA is headquartered in Fresno, California.
