

**THE ONLY
ELEMENT OF
DEFENSE
AGAINST
ROOT
INTRUSION**

TECHLINE COPPER™

**Infused with Cupron® copper oxide for a multi-layered defense against roots,
so your irrigation system can perform year after year.**

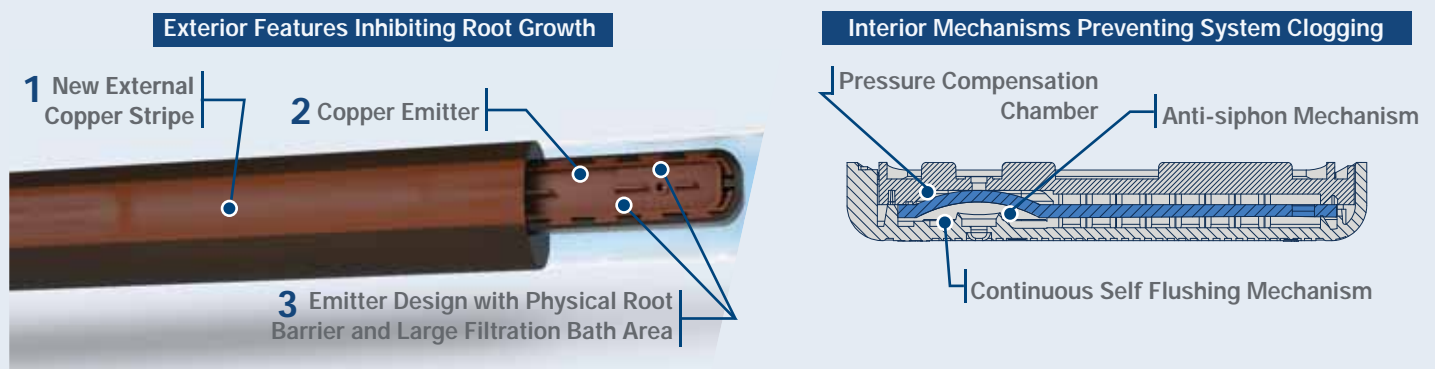

TECHLINE COPPER™ BATTLES ROOT INTRUSION

Roots are one of the biggest threats against a high performing drip system. Once they penetrate the dripline, they can reduce or block flow potentially impacting the health of your plants and garden. A multi-layered defense against roots is the solution for protecting your irrigation system, keeping your landscape lush. Techline Copper, the only product in the industry infused with Cupron copper oxide technology, is the most clog-resistant dripline available. Copper oxide, a proven antimicrobial is infused into the dripline and emitter, the unique patented HCV emitter design with physical root barrier will give your system the best defense against roots.

THREE LAYERS OF PROTECTION FROM THE OUTSIDE AND INSIDE

ANATOMY OF A MULTI-LEVEL DEFENSE STRATEGY

Techline Copper is designed with exterior features and interior mechanisms that inhibits root growth and prevents system clogging. Combined, these features make Techline Copper the highest performing dripline in the industry. Your irrigation system is protected from the outside and inside.

TECHLINE COPPER™ DESIGNED FOR SUBSURFACE, ON-SURFACE, ANY SLOPE OR GRADE

ADVANTAGES

- The highest distribution uniformity of water
- High Check Valve holds back 8.5' of water
- 15 year warranty
- Flexible UV resistant tubing

SPECIFICATIONS

- Emitter flow rates: 0.33, 0.53, 0.77, 1.16 GPH
- Emitter spacings: 12", 18", 24"
- Pressure range: 21.8 - 58 psi
- Tubing diameter: 17mm
- Coil lengths: 100', 250', 500', 1,000'
- Diaphragm: molded silicon
